# Penta Demo report

1/24/23

Aim of Penta Demo report

This report is meant to demonstrate how routine analysis of routine immunisation data can be made more quickly, without consuming a lot of time for data managers and also gives an edge with the power of open-source technology. Data managers can make appealing visualisations if you can easily export data from dhis2 using R
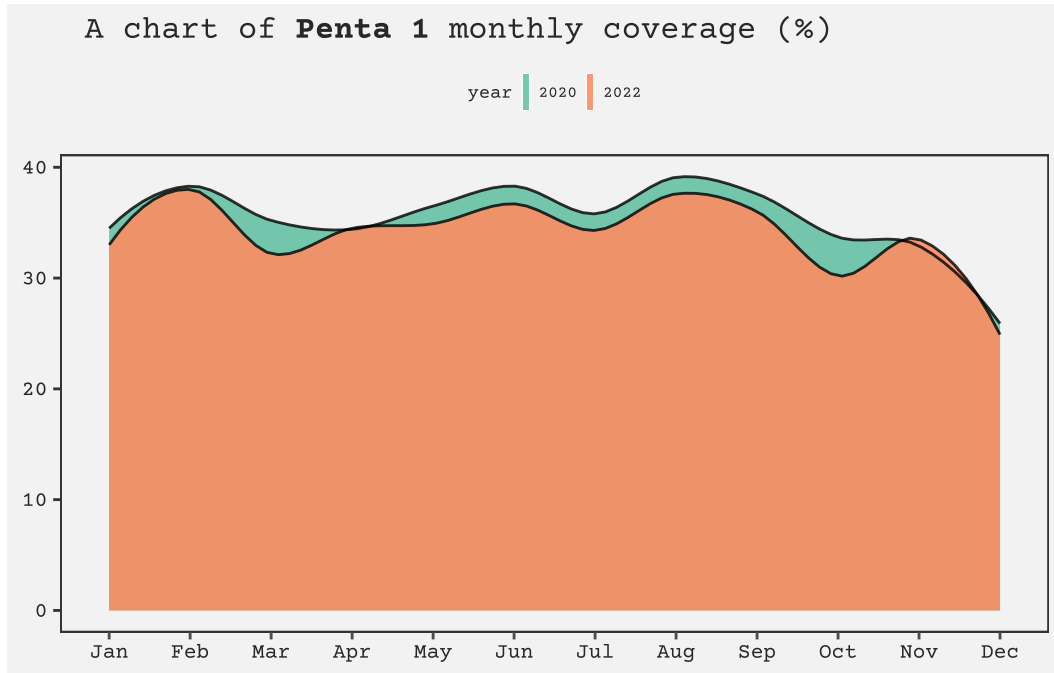

This narrative can change

Data visualistaion using different districts

A chart of **Penta 1 <1y**, **Penta 3 <1y** Coverage and **Dropout rate**

You can put all your explanations here of the current period.

These explanation can easily be made by Epidemiologist in MS word

Data visualistaion using different periods

A chart of **Penta 1** monthly coverage (%)

year ▎ 2020 ▎ 2022

More explanations of the second plot

This number changes if the period changes

The year 2020 had an average of 35.18
